            <div class="project-info">

              <h1>Project 1</h1>

              <h2>RESTAURANT BILLING SYSTEM</h2>

              <p>Developed a Restaurant Billing System in C to streamline the billing process within a

                restaurant environment. Features include menu management, order processing,
billing,

                payment integration. The system enables efficient management of orders, generates
detailed

                bills, and provides insights into sales performance. With user-friendly interfaces for
both

                customers and staff, it enhances operational efficiency and improves the overall
dining

                experience. This project showcases my proficiency in C programming and my ability
to develop

                practical solutions for real-world scenarios.</p>
```
